

## **HIPERSTATION RELEASE V050300**

Number: 251  
Issued Date: March 24, 2000  
Effective Date: May 11, 1997  
Section/Groups: Database/CICS Administration  
Submitted By: David W. Miller  
Approved By: Glenda Hudgens

The ITS Database Administration Group is implementing Release V050300 of Hiperstation For MVS by Compuware. This new release will be implemented to CPU4 on May 11, 1997. Hiperstation is available only on CPU4 through option L.HIPR. The product was purchased to facilitate both Applications and MVS "stress testing." It also has useful features applicable to Applications Online Regressions and Version testing.

Enhancements for Release V050300 of Hiperstation include:

- Year 2000 Support
- Enhanced LU0 Support
- Added REXX Features
- Improved Performance

For additional information regarding Hiperstation For MVS or to arrange for a "free" demonstration on how this product might assist in Applications or MVS testing scenarios, please contact David W. Miller at 538-3851.
